Time Zone Used Throughout the Order: Local

Task Organization: Infantry Platoon

1. SITUATION.

- a. Enemy. See Base Order.
- b. Friendly. See Base Order.
- c. Attachments and detachments. N/A

2. MISSION. TF platoon CQM Committee conducts reflexive fire training on Range 4/5 from 22 Jun-31 Jul 04 for CFT/CBT in order to familiarize cadets with Close Quarters Marksmanship techniques and procedures.

3. EXECUTION.

a. Intent.

Purpose. Provide an opportunity for 3<sup>rd</sup>/4<sup>th</sup> Class Cadets to experience reflexive and discriminatory fire techniques utilized by current Army forces.

Key Tasks. Train Cadets in the proper reflexive fire commands, introduce cadets to reflexive fire techniques/drills, and inspire cadets to conduct CQM training as part of their training plan as they enter the Army.

End state. Each cadet will depart the range with a comprehensive understanding of the difficulties of discriminatory and reflexive shooting.

b. Concept of Operation. This operation is conducted in three phases:

(1) Phase I, (01 Dec 03- 26 May 04): This phase commences upon receipt of the OPORD and concludes with the deployment of the TF to Camp Natural Bridge. There are two objectives of this phase. The first is to identify specific training requirements. The second is to prepare for the execution of committee training by gathering the

## UNCLASSIFIED

necessary resources, rehearsing training POIs, and validating primary instructors prior to deployment to USMA. The end state of this phase is that the committee is familiar with the classes and materials that they will train the Cadets.

(2) Phase II, Execution (27 May-08 Aug 04): This phase commences with the arrival of the Augmenting TF to Camp Natural Bridge, and concludes with the last day of committee training. This phase is further broken down into the following three sub-phases:

(a) Phase IIa, Equipment draw and site set-up: This phase begins with the drawing of supplies and concludes with the validation of the training site by the USMA Command Group. The purpose of this sub phase is to provide the committee with the resources, and the set-up time to ensure that it is adequately prepared to train Cadets. The committee will draw its training equipment, vehicles and other resources from the USMA Cadet Supply Activity approximately two weeks prior to actual training. Once supplies are drawn, the committee must establish its training site and conduct training rehearsals. Once the site is set up and the committee is prepared to start training cadets, it will be validated by the USMA/TF chain of command. The end state of Phase IIa is that committees have been validated on their training and are prepared to train Cadets.

(b) Phase IIb, Execution: This phase begins with the first day of training and concludes when the last company is trained. The objective of this phase is to provide challenging, realistic training on close quarter's marksmanship shooting engagement skills and energize the West Point War Fighter mindset. The end state is a more confident Cadet who will meet the challenges of today's austere and restrictive battlefields due to successful, inspirational training. For CFT, this phase begins on 22 JUN 04 and ends on 08 JUL 04. The objective of this phase is to safely execute 8 days of company training—one company per day. For CBT this phase begins on 28 Jul 04 and ends on 31 JUL 04. The objective of this phase is to safely execute 4 days of training—2 company's per day.

(c) Phase IIc, Recovery. This phase will be conducted in two parts—CFT (part 1), CBT (part 2). Part 1 begins on 08 JUL 04 and ends o/a 09 JUL 04. The end state of this phase is Range 4 is cleared, all equipment and supplies are turned-in, and committee AAR is conducted. Part 2 begins on 01 Aug 04 and ends o/a 02 Aug. The end state of this phase is Range 4/5 is cleared, all equipment and supplies are turned-in, and committee AAR is conducted.
